*Architecture is to make us know
and remember who we are.
- Sir Jellicoe Geoffrey*

I appreciate your interest in The Highlands Group Architects.

Creating architecture that is beautiful, historical, contextual, humanistic, functional and environmentally responsible is the guiding vision of THG Architects. Our firm practices architecture that is respectful of architectural traditions while addressing the realities of modern life. A significant portion of our practice is dedicated to fine home design. The unique features of the site, the personalities of the owners, and the community in which they live all inform the spirit and style of each home we design. We pride ourselves in conducting our practice with the highest respect for both our clients and the Architectural profession.

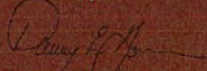

The Highlands Group Architects was founded in 1989 in Roanoke, Virginia. The firm is composed of a staff of eight, including two licensed architects. Our designs span a wide range of project types and architectural styles. We have had the opportunity to design homes in Virginia, West Virginia, North & South Carolina, Florida, Colorado & Wyoming. We have nine houses completed, three under construction, three designs that are unbuilt, & three currently on the boards in The Greenbrier Sporting Club.

The Highlands Group Architects does not offer a stock plan service, however, we would appreciate the opportunity to speak with you about designing your next home; a home that reflects your lifestyle and desired architectural style while responding to the natural features of the site, view sheds, solar orientation and environmental considerations. To that end, THG Architects is proud to be a member of the U.S. Green Building Council.

We offer a broad range of services and corresponding fees. We have the flexibility to define a level of service and scope of work that fits within your needs and budget.

We look forward to hearing from you and welcome an opportunity to speak with you regarding your project.

Sincerely,

Danny L. Goins, President
