ESM Architects, formerly known as McConnell and Ewing Architects, has designed more than twenty projects in the beautiful Greenbrier Valley since 1998. Based in Cincinnati, Ohio, our team is led by Architects Brad Ewing, Brian Schwieterman, and Mark McConnell. The hallmarks of our practice include people-focused design and a team approach which together guide our work from our unique on-site initial design sketching session through the completion of your project. We truly enjoy the relationships that develop as clients become friends when we collaborate to create your new custom home.
