Mark C. Dunkley Architecture, Inc.

Mark C. Dunkley Architecture, Inc. is a private architectural firm specializing in custom residential renovations, additions, restorations, new homes, vacation homes, and small to medium size commercial projects with a strong emphasis put on quality of design as it relates to the client's needs, the environment, site conditions, sustainability, and overall functionality. We have been practicing architecture for over 7 years and licensed in Ohio, Kentucky, and West Virginia.

We will meet the client at their site, conceptualize with them, and begin designing the first day as a team with the client. We will assist the client from the first sketch, through design development, construction documents, contractor selections and negotiations, finish selections, interior design, landscape considerations, construction observations, final punch list, sales and marketing material, and so much more.

Architecture is an art form and Mark Dunkley strives to bring that sense of artistry to every project. At Mark C. Dunkley Architecture, we like to design in 3-dimensions. Our world is not experienced through a series of floor plans and elevations. Our Design process take advantage of our "natural senses" by producing interior and exterior perspectives that can give the client a "real" concept of their new home.

Let us turn your dreams into a reality!
