

FIRM PROFILE

Located in Cincinnati, in the neighborhood of Hyde Park, RWA Architects has been providing the highest level of quality custom residential architecture since 1989. The primary focus of our firm is to offer superior architectural services and design excellence to the Client while providing full support to the Contractor throughout the entire construction process. RWA is able to provide these services on both a local and national scale with an experienced and qualified staff of Architects and Designers that support the two Principal Partners of our firm.

We make it our mission to practice both responsiveness and responsibility to our Clients, to possess a keen interest in design excellence and technical competency and to maintain a high level of cooperation, collaboration and sheer enjoyment in the architectural process. However, the hallmark of RWA's work is integrity. Professional integrity means knowing the difference between impractical dreaming and creative solution seeking. It also includes knowing what the balance is between borrowing from tradition and inventing new solutions to any challenges. Ultimately our effectiveness is dependent upon our team being available, skilled and committed.

RWA actively seeks an environmentally sustainable approach that is as extensive as project goals will allow. We have the skills to help our clients lessen their environmental impact whether the project be large or small. RWA is familiar with green building rating systems, available tax abatements, setting environmental priorities, and life cycle analysis. In Cincinnati, RWA is known as a leader in Sustainability. We have invested time and resources in learning, developing, and supporting green/sustainable design in our practice since 1997. RWA is active in the local sustainable design community, including AIA Committee on the Environment (COTE) and U.S. Green Building Council (USGBC). Several of our staff are LEED Accredited Professionals and our firm is a member of the United States Green Building Council.

In order to maintain the high level of satisfaction that we enjoy with our Clients, our design process begins and ends with the focus clearly on them and their expectations. This is accomplished first, by listening and learning all we can about their needs, dreams and preferences at the beginning of the project. Next, by being attentive to their programmatic, aesthetic, budgetary and technical constraints and requirements throughout the project. And finally, by keeping open and honest communication to the completion of the project, making sure the priority is always Client satisfaction.
