

Wilmes & Associates Architects, PSC is an award-winning, full-service architectural design firm with 25 years of experience in delivering quality residential homes. We envision spaces with a client's desires in mind and have an eye for creating environments that are interesting spaces in which to live.

Each of our private homes located on the Greenbrier property is tailored to fit the owner's specific lot and to take advantage of the gorgeous views.

On the exterior, we focus all of our attention on proper use of scale, quality materials, detailed moldings, window fenestration and colors that blend with their environment. Creation of porches, outdoor patios and courtyards, the outside living spaces receive as much attention to detail as the interior spaces.

In the interior, flow, function and balance between rooms are of the utmost importance. The proper scale is essential in order to achieve spaces that are comfortable to live in and feature interesting details of cabinetry, moldings and good use of light to create a warm environment.

While special attention is paid to creating interior and exterior spaces that are inviting and allow good flow throughout the home, Wilmes & Associates Architects is experienced in working closely with the design team, the builder and the management team at the Greenbrier. This expertise and experience ensures that the client's best interests are served.

With personalized attention to each project, Wilmes & Associates Architects focuses on the specific needs of each client, thus winning repeat and referred business. We have worked in many different regions in the country and are licensed in more than 16 states.
